

**Table 5**

Maternal Factors Associated with Length of Stay

|                           | <i>Length of stay in days<br/>(mean ± SD)</i> | <i>p</i> |
|---------------------------|---|----------|
| Diabetes                  |   |          |
| Yes                       | 10.4 ± 9.4                                    | 0.049    |
| No                        | 7.8 ± 6.9                                     |          |
| Rupture of membranes >18h |   |          |
| Yes                       | 11.6 ± 8.3                                    | 0.034    |
| No                        | 7.8 ± 6.9                                     |          |
| Twin or greater gestation |   |          |
| Yes                       | 10.3 ± 9.5                                    | 0.002    |
| No                        | 7.4 ± 6.2                                     |          |
| Abruptio placentae        |   |          |
| Yes                       | 12.9 ± 13.2                                   | 0.154    |
| No                        | 7.9 ± 7.9                                     |          |
