Figure 1

Flowchart of the Results from the Literature Search

Potentially relevant articles identified and screened for retrieval \( (n = 189) \)

- Articles deemed relevant based on title and abstract
  - Do not meet criteria \( (n = 8) \)
    - Full text article retrieved \( (n = 31) \)
  - Meet criteria \( (n = 23) \)
    - Retained for analysis \( (n = 25) \)

- Potentially relevant articles (title and abstract alone did not provide sufficient information)
  - Do not meet criteria \( (n = 3) \)
  - Full text article retrieved \( (n = 5) \)
  - Excluded from
    - Excluded from
