

Table 2

Examples of Genomic Competencies Specific to HIM Students across Educational Levels

Educational Level	Genomic Competency within HIM Curriculum
Associate	Understand the use of genomic data within the EHR and maintain the privacy and security of this information.
Baccalaureate	Capture and organize genomic data in the EHR so that it is easily accessible for healthcare providers to use to properly treat patients while still maintaining privacy and security of the information.
Master's	Analyze genomic data for accuracy, reliability, and overall quality and disseminate the analysis while maintaining the privacy and security of the information.
