

SUMMER 2014 INTRODUCTION

Posted on July 1, 2014 by Administrator

Category: [Upcoming Issues](#)

The Summer 2014 issue of *Perspectives in Health Information Management* features a study examining the differences in coding productivity between ICD-9-CM and ICD-10-CM/PCS, findings of a pilot study on electronic health records conducted in a primary health center in rural India; and study examining perceptions of HIM students, faculty, and individuals employed in healthcare regarding educational experiences and career preparation. Read the full issue [here](#). Learn more about submission guidelines [here](#).

Perspectives in Health Information Management is a scholarly, peer-reviewed journal, referred to by professors, professionals, public officials, industry leaders, and policy-makers. Since 2004, *Perspectives* has been one of the most credible and respected journals of the HIM industry, and is referenced in notable indices such as PubMed Central (PMC), the Cumulative Index to Nursing and Allied Health (CINAHL), and Google Scholar. Join *Perspectives* in celebrating 10 years of scholarly publishing that advances health information management practice.
