

**Table 4**

Bivariate Analysis between Knowledge of Classification Systems and Demographic Characteristics of Physicians

	Knowledge of Classification Systems		<i>p</i> -value
	No <i>N</i> (%)	Yes <i>N</i> (%)	
<b>Workplace</b>			0.008
Public hospital	49 (41.9)	68 (58.1)	
Private hospital	27 (65.9)	14 (34.1)	
<b>Gender</b>			0.091
Male	46 (43.4)	60 (56.6)	
Female	30 (57.7)	22 (42.3)	
<b>Category of professional experience</b>			<0.001
Specialized (under training in order to obtain a specialization)	5 (15.2)	28 (84.8)	
Specialist (<10 years of experience)	24 (58.5)	17 (41.5)	
Specialist (≥10 years of experience)	47 (56)	37 (44)	
<b>Type of graduate degree (in addition to the basic medical degree)</b>			0.003
None	59 (56.7)	45 (43.3)	
Master's degree or PhD or both	17 (31.5)	37 (68.5)	
<b>Age</b>	46.8 (9.55)*	39.2 (10.41)*	<0.001
<b>Number of Greek conferences</b>	5 (5)**	10 (8)**	<0.001
<b>Number of international conferences</b>	2 (3)**	4 (4)**	0.001

\* Values are expressed as mean (standard deviation).

\*\* Values are expressed as median (interquartile range).
