

Table 2

Transmission Type

Average Number of Transmissions Per Patient Per Month	Conclusion	Significance
Transmissions	Number of overall transmissions decreased 0.4	Not statistically significant ($p = .077$)
Scheduled transmissions	Scheduled transmissions increased 0.2	Statistically significant ($p < .001$)
Unscheduled transmissions	Unscheduled transmissions decreased 0.6	Statistically significant ($p < .01$)
Missed transmissions	Missed transmissions decreased 0.2	Statistically significant ($p < .001$)
Actionable transmissions	Actionable transmissions decreased 0.1	Not statistically significant ($p = .081$)
Nonactionable transmissions	Nonactionable transmissions decreased 0.4	Not statistically significant ($p = .114$)
