

**Table 1**

Summary of Interviewed Practice Characteristics

| <b>Practice Characteristics</b>                | <b>Number of Practices</b> |
|--|----------------------------|
| <b>Location</b>                                |                            |
| Northeast                                      | 4                          |
| South  | 3                          |
| West   | 3                          |
| <b>Setting</b>                                 |                            |
| Urban  | 8                          |
| Rural  | 2                          |
| <b>Practice size<sup>a</sup></b>               |                            |
| Single physician                               | 3                          |
| Small group (<25 providers)                    | 3                          |
| Large group (>25 providers)/multisite practice | 4                          |
| <b>Type of EHR</b>                             |                            |
| Epic   | 2                          |
| eClinicalWorks                                 | 2                          |
| eMDs   | 1                          |
| GE Centricity                                  | 1                          |
| NextMD   | 1                          |
| NextGen  | 1                          |
| Medent   | 1                          |
| Welford Chart Notes                            | 1                          |

<sup>a</sup> Two sites were Federally Qualified Health Centers, and one site was a training site for a nearby medical school.
