Study Selection Flow Diagram

Identification

PubMed = 137
Scopus = 265
CINAHL = 1
ABI/Inform = 10
Embase = 319

Screening

Titles and abstracts screened = 732

- Duplicates and non-peer reviewed publications = 460
- Articles not meeting inclusion criteria = 243
  (Studies conducted outside the United States, pertaining to pediatric population, nonempirical, involving more than one chronic condition)

Eligibility

Articles selected for full text review = 29

- Exclude studies = 6
  (Inadequate study rigor, no patient-level outcomes)

Included

Studies included in the review = 23
